

OfficeServ™ Wireless

Enterprise Mobility IP Solutions

First, voice technologies converged with data. Now, wireless has converged with wireline. With the OfficeServ™ Wireless solution, you have the final piece to a truly converged work environment - voice, data, wired and wireless all operating together on one integrated system. Running on Samsung's OfficeServ™ 7000 Series, OfficeServ™ 500 or OfficeServ™ 100 IP-enabled platforms, OfficeServ™ Wireless provides convenient mobility throughout your enterprise so users can stay connected and productive even when they're away from their desks.

OfficeServ™ Wireless unleashes your people, delivering clean and clear voice quality across wireless LAN access points to your WIP-5000M handset. And stepping away from your desk no longer means losing access to the Internet or other data sources, since you maintain wireless data connections through your laptop or PDA.

The productivity of mobile professionals in distribution centers, healthcare facilities, the hospitality industry, warehousing, manufacturing, educational institutions and other industries will soar with the convenience of staying connected to feature-rich voice and data services.

SAMSUNG

OfficeServ™ Wireless Features & Specifications

Your challenge is to maximize the mobility of your diverse force and keep your users' productivity at its peak while they access, create, share, and print information they need every day. Samsung answers that call with the OfficeServ Wireless Dual Band solution: an affordable 802.11 a/b/g WLAN communications powerhouse utilizing the popular WIP-5000M Samsung handsets. Your wireless handsets and Access Points deliver secure, scalable services which integrate seamlessly with your existing wired network system. Samsung's standards-based, centralized management for your wireless network insures exceptional service quality for your users, and secure protection for your system. As your business needs grow or change, preserve your investment as you easily migrate to a different Samsung platform while using your existing wireless handsets.

With Dual Band Access Points supporting voice and data networks, and your channel access priorities set to match your needs, the OfficeServ Wireless solution accommodates all your business communication needs. In addition, this feature-rich wireless solution is easily programmed from a desk phone or a networked PC, making it easy to install and painless to maintain at top performance levels.

Wireless LANs are real-world extensions of your wired services that make sense, but coverage areas can be difficult for you to arrange, with thick walls to consider, ominous obstructions, or other complex layouts. Your OfficeServ Wireless solution is designed to support a number of Access Points that is limited only by your system's number of available Media Gateway Interface (MGI) channels.

OfficeServ™ Dual Band SMT-2000 Wireless Solution

WIP-5000M Wireless IP Handset

- ▶ Innovative, modern, attractive, lightweight design
- ▶ Menu-driven graphical display provides easy access to system features
